

## Extending the Library Yourself

Create new file shinabi/components/\_badge.scss

```
@use 'sass:math';

@mixin badge($bg-color: $info) {
  border-radius: $base-border-radius * 4;
  background-color: $bg-color;
  padding: math.div($base-padding, 4) math.div($base-padding, 2);
  font-size: $font-size-sm;
  font-weight: normal;
}

.badge {
  @include badge;
}

@each $key, $val in $colors {
  .badge-#{$key}{
    @include badge($val);
  }
}
```

Import file in shinabi/index.scss

```
// variable & function
@import "functions";
@import "variable";

// base & layout
@import "base";
@import 'breakpoints';
@import 'grid';

// colors
@import "colors";
// components(button, card, navbar)

@import 'components/card';
@import 'components/buttons';
@import 'components/navbar';
```

```
@import 'components/badge';

// utilities(margin, padding, opacity)
@import 'utilities';
```

## Homepage.html update:

```
<!-- work section -->
<section id="work" class="mt-5">
  <div class="container">
    <h2 class="mb-2">Some of Our Work</h2>
    <div class="row gap-2">
      <div class="col-12-xs col-6-md col-3-lg">
        <div class="card p-0">
          <h3 class="card-title m-1">
            Mario Club <span class="badge-orange text-white ml-1">new</span>
          </h3>
          
          <p class="m-1">Lorem ipsum dolor sit amet, consectetur adipisicing
elit. Totam, hic!</p>
        </div>
      </div>
    </div>
  </div>
```

## Browser output:

### Some of Our Work
